

TAIFU GRS15/6 Circulation Pump (180 mm)

TAIFU GRS15/6 circulation pump is designed for heating systems and ensures efficient circulation of hot water through radiators and heating circuits. The pump provides stable water flow and uniform heat distribution across the entire heating installation.

Parameter	Value
Model	GRS15/6
Brand	TAIFU
Type	Circulation Pump
Application	Heating systems
Installation Length	180 mm
Maximum Flow	50 L/min
Maximum Head	6 m
Maximum Pressure	10 bar
Water Type	Clean water
Body Material	Cast Iron
